

# Making games you already own.

A plan for the tabletop ecosystem we're building — open-source rulebooks, a hex-grid online engine, and a marketplace for the modders who'll fill it.

● Open alpha · [nukes.moddable.games](https://nukes.moddable.games)

[team@moddable.games](mailto:team@moddable.games)

# Publish moddable tabletop games — and turn *players, artists and designers* into co-creators.

## An open-source ethos.

Every rulebook is forkable. Every component is replaceable. Every variant is a pull request waiting to happen. Modders aren't a side channel — they're how the catalogue grows.

## Why we're called *Moddable*.

Not a publisher. Not a platform. A toolkit — a hex-grid engine, a print-on-demand pipeline, and a marketplace — that turns the boards on your shelf into the boards you wanted them to be.

# Territory. Attrition.

## *Nuclear brinkmanship.*

A hex-tile board game where every token is a unit, a hostage, and a countdown timer — all at once. Plays on a board you already own.

PLAYERS **2–3**TIME **45+ MIN**AGE **12+**

## ▲ THE INSTALLED-BASE PLAY

Catan's hex tiles are a Nukes board out of the box. *45 million homes* are already set up.

## CORE MECHANIC · TOKEN COUNT = UNIT TYPE

1 TOKEN

**Infantry**

2 TOKENS

**Artillery**

3 TOKENS

**Airborne**

4+ TOKENS

**Base** ☢

## THE COUNTDOWN · HOSTAGES

Return your *opponents' tokens* to earn moves — but reinforce their armies in the process. Run out of hostages, you lose.

# Replacing squares with *hexagons*.

Six neighbours instead of four. No diagonal exceptions. No edge-case rules. The math of strategy gets cleaner the moment the grid does.

6 adjacencies

0 diagonals

∞ variants

SQUARES • 4 NEIGHBOURS

HEXAGONS • 6 NEIGHBOURS

*Why now:* we're building our own online engine for hosting hex-based games, so any tabletop designer can ship a hex variant without rolling their own infrastructure.

# Play anywhere. Continue *everywhere*.

Create private sessions. Hand off mid-game between phone, tablet and laptop.  
Pause a session in May, finish it in October. The board waits.

● Open alpha · `nukes.moddable.games`

private sessions · cross-device · async

# Play with friends — or *instructive bots*.

Every game played online — human-vs-human or human-vs-bot — improves the next bot you'll face. The engine is a teaching engine first, an opponent second.

## DIFFICULTY TIERS

# 3

Apprentice · Tactician · Grandmaster

Each tier annotates its moves — learn by watching the AI think.

## TRAINING DATA

Every match feeds the next bot.

Anonymised game logs, opt-out by default for private sessions.

## LATENCY MODE

Async-by-default.

No live-server requirement. Notify on opponent's move.

# More original games on the table.

All three share the same modular hex board and the same online engine — every shipped game makes the next one cheaper.

## NUKES

DETERMINISTIC · 2P · 30 MIN

Wartime token strategy on a modular hex board.  
Chess × Checkers × Go on Catan hexes you already own.

PROGRESS

95%

OPEN ALPHA · LIVE

## MONGO

CONQUEST · 3-6P · 90 MIN

Global conquest in the *Flash Gordon* universe —  
Risk × Catan in a public-domain setting we don't have to license.

PROGRESS

50%

PLAYTEST · Q3 2026

## ENDLESS SKIES

EXPLORATION · 1-4P · 60 MIN

Worker-placement exploration, trading and combat — based on the popular open-source video game of the same name.

PROGRESS

25%

DESIGN · Q1 2027

# Become the ecosystem tabletop is still *missing*.

A place where physical and online play converge under community ownership — and an online engine and marketplace where anyone can monetise their creations.

01 · ENGINE

Host any hex-based game online.

02 · MARKETPLACE

Designers sell mods, art and expansions.

03 · COMMUNITY

Modders own the catalogue.

# Why now? The boards are already on the shelves.

45M

Catan sets sold

Every one of them a hex board for Nukes  
— no new components required.

275M

Monopoly sets sold

500M people have played. *Econopoly*  
ships a fairer rulebook.

\$3B

Online chess by 2032

Public-domain. Never been more  
popular. No moddable compendium yet.

30B

Checker sets ever sold

Since 1000 BCE. The oldest installed  
base on the planet.

# How we make money without fearing the copycats.

Two tracks, run in parallel. One bootstraps slowly with revenue. The other unlocks with funding — and shortens the timeline.

TRACK  
A

Bootstrap · slow

## Organic growth.

Revenue funds the next print run. No outside cheque required.

- 01 *Print-on-demand* for first runs — no inventory risk
- 02 Online store for *generic components* — hexes, tokens, dice
- 03 Branded merchandise and tabletop tools
- 04 Licensing agreements with adjacent IP holders
- 05 Original games commissioned for specific brands

TRACK  
B

Funded · fast

## Engineered growth.

Outside capital builds the engine, the marketplace, and the team.

- 01 Build the online engine for hex-based games *at scale*
- 02 Self-publishing tools for designers — drag-and-drop rulebooks
- 03 Marketplace for games, expansions and printable components
- 04 Collect training data for stronger in-game bots

# The engine doesn't stop at *hexes*.

Live in alpha today: a card deck tool and a modular chess board. Both running on the same backbone that powers Nukes — proof that one engine hosts wildly different tabletop families.

▲ TRACTION · OPEN ALPHA

**2,400+ sessions** played across both tools — entirely organic, zero ad spend.

[moddable.games/tool/decks](https://moddable.games/tool/decks)

[moddable.games/tool/chess](https://moddable.games/tool/chess)

# Mod the games people already love.

Three rulebook mods in active development — each targeting a game with a built-in audience and a known itch the original rules don't scratch.

MOD • MONOPOLY

## Econopoly

Monopoly with a working economy. Anti-monopoly rules, dynamic property pricing, and a tax band that actually does something.

PROGRESS

DESIGN

# Chess — the most modded game in *history*?

Hundreds of variations exist. Most are buried in forum threads and PDFs. None have a playable, modular compendium online — *until now*.

2000+ 

documented chess variants in the wild

unified online compendium today

1

moddable engine — ours

# DUNGEON CHESS

Chess as an asymmetrical  
*skirmish and dungeon crawler.*

Our first original mod for Moddable Chess. Four races on a modular board with spells, objects, XP and environmental hazards — our catalyst for crowdfunding the catalogue.

## BATTLES

### 2–4P skirmish

Drafted • 30 min

## ADVENTURES

### 1–6P legacy

Persistent campaign

## FOUR ASYMMETRICAL RACES

☉ **Demonics**

☉ **Wraiths**

☉ **Knights**

☉ **Verdants**

\* Demonics confirmed; other names provisional pending playtest

## XP

Pieces  
level up

## SPELLS

Magic +  
objects

## TERRAIN

Hazards &  
obstacles

## OBJECTIVES

Beyond  
check-mate

# A ladder of stretch goals.

Each tier adds more sections to the board — and unlocks the next family of variants the engine already supports.

**LV-01****Regular 2-player Chess**

4 board sections · 100 squares · 60 chess pieces

Base goal

**LV-02****4-player Chess**

15 board sections · 192 squares · 100+ pieces

Stretch

**LV-03****XiangQi + 4 board variants**

26 board sections · 256 squares · regional rule sets

Stretch

**LV-04****Dungeon Chess**

Asymmetrical races · spells · objects · objectives

Headline

**LV-05+**

Extra races · upgraded boards · custom components — open-ended, set by community votes at launch.

Community

# An ecosystem where creators *monetise* their own work.

01 · PRINT-ON-DEMAND

## Moddable prints on demand.

Moddable Chess pieces, miniatures, build-your-own hex tiles — printed only when ordered, no inventory drag.

02 · COMMUNITY

## Community contributions.

Artists sell themes for existing games. Designers publish their own expansions. We take a cut, they keep the rest.

03 · SELF-PUBLISHING

## Self-publishing.

Creators validate ideas online first — then monetise their community by shipping through our marketplace.

# Who's making this happen.

A modder-founder, a systems-thinker playtester, a board-game evangelist who builds the engine, and a game artist with TV credits.

Mark Smalley

## Mark Smalley

FOUNDER · DM · BUILDER

Modder since forever. Built the world's first NoSQL CMS and a *500 Startups*-backed Bitcoin wallet.

Kevin Chand

## Kevin Chand

PLAYTEST · GROWTH · OPS

Systems thinker. Chief playtester and social engineer leading online growth, marketing and manufacturing.

Akmal Fikri

## Akmal Fikri

ENGINE · COMMUNITY

Web developer and board-game evangelist. Builds the online engine — grey hair earned the hard way.

Iqbal Ridzuan

## Iqbal Ridzuan

LEAD ARTIST · CREATIVE

Head of creative. *BioHack* and *Mechamoto* — featured on BoardGameGeek and IMDB.

# Resources, timing, phases.

// working list – to be replaced with facts, figures, timelines and sheets.

## 01 · REQUIRED RESOURCES

### What we need.

- ▲ Full-time developers and designers
- ▲ Capital for the first print run
- ▲ In-house manufacturing capability

## 02 · TIMING

### Why now.

- ▲ Who becomes the next *chess.com*?
- ▲ Can we ship Moddable Chess before someone else does?
- ▲ Tabletop's online infra is still a green field

## 03 · PHASES

### In what order.

- P1 Launch Moddable.Games
- P2 Bootstrap mods + Nukes production
- P3 Crowdfund Moddable Chess or Mongo

# Two ways to work with us.

## A · INVESTMENT OPPORTUNITIES

### Back the catalogue.

- 01 *Purchase royalties* on specific upcoming games
- 02 Fund accelerated growth — *equity* in Moddable.Games
- 03 Sponsor our crowdfunding campaign kick-off

## B · PARTNERSHIPS

### Build with us.

- Custom development* of branded games
- Licensing agreements to use other brands
- Educational games designed for specific courses
